Purpose of studying of the discipline

the formation of an interdisciplinary worldview among undergraduates, based on a deep understanding of the history and philosophy (theory) of scientific thinking, as part of a universal culture.

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activity.

Prerequisites

Bachelor

Postrequisites

Final examination

Tertiary education

Discipline cycle	Basic disciplines
Course	1
Credits count	3
Knowledge control form	Examination

Short description of discipline

The course is aimed at studying the main directions, principles and patterns of higher education. During the course of the course, the basic concepts of modern pedagogy, concepts and theories of teaching and upbringing, didactics of higher education will be considered. The master's student will master the skills of designing the organization of the educational process, techniques of individual and group reflection, will be able to correctly formulate pedagogical goals, apply educational technologies in the educational process. In the process, to design work programs of disciplines.

Purpose of studying of the discipline

The purpose of mastering the discipline is to master the system of knowledge about higher education, its content, structure, principles of educational process management and mastering modern technologies in the field of management and organization of the educational process

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

- Solves the problems of higher pedagogical education and the prospects for its further development;
- Considers the application of effective university technologies;
- Solves topical and psychological and pedagogical problems,

Prerequisites

Bachelor

Postrequisites

Teaching practicum

Psychology of management

Discipline cycle	Basic disciplines
Course	1
Credits count	3
Knowledge control form	Examination

Short description of discipline

The content of the course is aimed at mastering the approaches and directions of management psychology, psychological laws of management, features of planning and solving management problems. Students will get acquainted with the psychological methods of resolving conflict situations, master the ways of motivating work, the methods of using effective management styles. Skills will be formed to analyze the psychological causes underlying the decline in the effectiveness of the management process.

Purpose of studying of the discipline

The purpose of the discipline "Psychology of Management" is the formation of scientifically based ideas about the system of mental phenomena, psychological variables of behavior and conscious human activity in modern conditions and allows undergraduates to form skills of applying the acquired psychological knowledge in educational activities

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

- they are able to determine the forms and methods of effective team management;
- develop plans for the development of organizations, provide psychological support for the activities of organizations;
- possess methods of solving managerial tasks.

Prerequisites

Bachelor

Postrequisites

Teaching practicum

Research activities of students in the Kazakh language and literature

Discipline cycle	Profiling discipline
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

During the course, the analysis of the scientific, theoretical and methodological foundations of the organization of the educational process of research activities is carried out. The ways of formation of research competence are determined. Has the opportunity to discuss research papers individually, in small classes, in groups and use them in practice. Based on the development of research methods, the research competence of magistrates is formed. The types of research project and ways of its implementation are proposed. Undergraduates master the rational methodology of organizing research activities.

Purpose of studying of the discipline

Analysis of the scientific-theoretical and methodological foundations of the organization of the educational process of research orientation. Mastering the rational methodology of organizing research activities

Learning Outcomes

ON2 To solve problems of higher professional education and prospects for its further development
ON3 Own a methodology and algorithm for planning and organizing research and teaching activities

Learning outcomes by discipline

ON2 To solve problems of higher professional education and prospects for its further development;
ON3 Own a methodology and algorithm for planning and organizing research and teaching activities.

The research competence of students is being formed. Performs research work individually, in small classes, groups and applies them in practice. Owns research-oriented projects, types of practical projects and ways of their implementation. Owns a rational methodology for organizing research activities.

Prerequisites

The periodization of modern Kazakh literature. Tendencies and new areas in the Kazakh Linguistics

Postrequisites

Research scientific training The research work of a student, including an internship and the implementation of a master s thesis II

Auezov and problems of literary criticism

Discipline cycle	Profiling discipline
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

To study the problems of literary criticism and creativity of M. Auezov, to reveal the writer`s relationship to world, Turkic literature, spiritual ties with foreign writers. To master the creative laboratory of the writer through the study of the literary work of M. Auezov, his works, translations, articles. Purpose of studying of the discipline

The purpose of teaching the discipline

To explain the legitimacy of the creative processes of M. Auezov, rich in heritage, the artistic significance of his works in connection with social conditions, the culture of the times.

Learning Outcomes

ON2 To solve problems of higher professional education and prospects for its further development

ON7 Prepare a professional specialist, a creative person, the formation of the necessary professional theoretical knowledge and relevant practical skills

ON8 As a philological education, the study of literature to explain the laws and features of the development of art and forms.

Learning outcomes by discipline

ON2 To solve problems of higher professional education and prospects for its further development;

ON7 Training of professional specialist, creative personality, formation of necessary professional theoretical knowledge and relevant practical skills.

ON8 As a philological education, the study of literature to explain the laws and features of the development of art and forms

To use information related to the work of Auezov and the study of literature, observation, comparison, thinking, theoretical knowledge in practice.

Gathers theoretical knowledge based on the work of the writer and formed in literary criticism, can critically prove scientific ideas and analyze concepts and theories.

Prerequisites

Scientific bases of dividing the history of literature into periods.

Postrequisites

Trends and directions of literature

The research work of a student, including an internship and the implementation of a master s thesis I

Discipline cycle	Profiling discipline
Course	1
Credits count	11
Knowledge control form	Total mark on practice

Short description of discipline

Analyzes fundamental theoretical and methodological, as well as related sciences of philological and literary studies, providing professional and social mobility in a changing world. Conducts a comprehensive analysis and evaluates global problems of fundamental linguistic and literary orientation in the effective use of language and literature resources

Purpose of studying of the discipline

To master the necessary scientific research methods, to solve the problems of a specific philological research, using the data of the Internet electronic Fund and the National Corpus of the Kazakh language, a master`s student can develop new approaches and update existing methods

Learning Outcomes

ON2 To solve problems of higher professional education and prospects for its further development

ON3 Own a methodology and algorithm for planning and organizing research and teaching activities

Learning outcomes by discipline

ON2 To solve problems of higher professional education and prospects for its further development;

ON3 Own a methodology and algorithm for planning and organizing research and teaching activities.

They will learn how to carry out research work independently or as part of a creative team. Analyzes scientific information on the research topic. Conducts theoretical or practical research within the framework of the assigned tasks. Analyzes the scientific and practical significance of the research

Prerequisites

Basic and profile disciplines of the EP

Postrequisites

The research work of a student, including an internship and the implementation of a master s thesis II

Teaching practicum

Discipline cycle	Basic disciplines
Course	2
Credits count	6
Knowledge control form	Total mark on practice

Short description of discipline

Pedagogical practice is aimed at studying the basics of pedagogical and educational-methodical work; formation of practical teaching skills in higher school; consolidation of knowledge of the courses "Pedagogy of higher school", "Psychology of management"; mastering various educational technologies, methods and techniques of oral and written presentation of subject material; obtaining and developing skills of conducting educational

Purpose of studying of the discipline

Carries out the formation of the future specialist's aptitude for his work, improving knowledge, skills and abilities in the organization of educational work with students.

Learning Outcomes

ON2 To solve problems of higher professional education and prospects for its further development

ON3 Own a methodology and algorithm for planning and organizing research and teaching activities

Learning outcomes by discipline

ON2 To solve problems of higher professional education and prospects for its further development;

ON3 Own a methodology and algorithm for planning and organizing research and teaching activities.

Implements theoretical knowledge in practice. Possesses the necessary psychological and pedagogical knowledge in professional activity. The skills of conducting educational work are being formed and developed.

Prerequisites

Tertiary education Psychology of management

Postrequisites

Research scientific training

The research work of a student, including an internship and the implementation of a master s thesis II

Discipline cycle	Profiling discipline
Course	2
Credits count	4
Knowledge control form	Total mark on practice
