History of pedagogy

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 1 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The course introduces students to the history and the main stages of the development of pedagogy. The pedagogy of the civilization of antiquity, the Ancient World, the Middle Ages, Renaissance and Modern Times is considered in detail. Students get acquainted with the pedagogical teachings of the founders of pedagogical science Ya.A. Kamensky, I.G. Pestalozzi, K.D. Ushinsky, A.S. Makarenko, Y. Altynsarin A. Kunanbayev, etc. The course content provides an introduction to the leading trends in the development of modern domestic and foreign pedagogy.

Purpose of studying of the discipline

to acquaint students with the process of development of pedagogical thought and education in different civilizations in different historical periods; to promote the formation of a holistic pedagogical consciousness and a critical assessment of historical and pedagogical ideas.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education. Learning outcomes by discipline

1. To reveal the most significant characteristics of the world historical and pedagogical process; 2. Describe the main stages of the development of the school and pedagogical thought of Kazakhstan;

3. Analyze the contribution of individual peoples and civilizations to the development of pedagogy and schools;

4. Be able to analyze the historical experience of upbringing and education of the younger generations from the point of view of the possibility of using this experience in solving modern educational problems;

5. To determine the place of the Kazakh school and pedagogy in the world historical and pedagogical process of a particular period. Prerequisites

Pedagogical skills

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 1 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The discipline is a system of educational and methodological materials that provide the student with the opportunity to acquire knowledge, skills and the formation of pedagogical skills. In the course of studying the discipline, knowledge of basic pedagogical disciplines is analyzed at the level of mastering professional pedagogical skills that promote professional self-identification. The educational material prepares the student for pedagogical practice in the conditions of the basic school considered as an important component of the professional competence of the future teacher.

Purpose of studying of the discipline

actualization of knowledge on basic pedagogical disciplines at the level of mastering professional and pedagogical skills that contribute to the professional self-identification of the personality of the future teacher, the formation of readiness for pedagogical practice considered as an important component of the professional competence of the future teacher.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education.

Learning outcomes by discipline

1. Knows the basic concepts of the theory of the subject.

2. Has the basic skills of pedagogical skills to work at school

3. Has basic knowledge of the subject, contributing to the student's self-identification as a teacher.

Preparing primary school teachers for inclusive education

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 1 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The content of the discipline examines the theoretical foundations of teacher training for work in inclusive education. Students get acquainted with the tasks and the system of training teachers to work in inclusive education. The specifics of psychological and pedagogical work with children with special needs are revealed in detail. Revealing the essential characteristic of the concept of "tutor", the course introduces students to the specifics of the teacher's professional and personal readiness for tutoring in an inclusive environment. By studying the course, students learn to monitor the evaluation of the implementation of the inclusive process.

Purpose of studying of the discipline

familiarization of students with the basic theoretical and technological approaches to the organization of education of children with special educational needs.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

Learning outcomes by discipline

1. Владеть навыками использования методов психолого- педагогической диагностики для решения профессиональных задач;

2. Уметь применять современные технологии разработки индивидуального образовательного маршрута и программ для обучающихся с особыми образовательными потребностями;

3. Уметь организовывать интерактивную коррекционно-развивающую среду, отвечающую образовательным потребностям детей с ограниченными возможностями здоровья;

4. Владеть навыками осуществления коррекционно-педагогической деятельности в условиях инклюзивного образования;

5. Владеть навыками осуществления продуктивного взаимодействия с детьми с особыми образовательными потребностями, их родителями и другими участниками образовательного процесса;

6. Уметь консультировать родителей детей с особыми образовательными потребностями.

1. Possess the skills of using methods of psychological and pedagogical diagnostics to solve professional problems;

2. Be able to apply modern technologies for the development of an individual educational route and programs for students with special educational needs;

3. Be able to organize an interactive correctional and developmental environment that meets the educational needs of children with disabilities;

4. Have the skills to carry out correctional and pedagogical activities in an inclusive education;

5. Possess the skills of productive interaction with children with special educational needs, their parents and other participants in the educational process;

6. Be able to advise parents of children with special educational needs.

Correctional pedagogy

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 2 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The course examines the essence, functions of psychological and pedagogical diagnostics, a set of diagnostic tools based on the development of the classification of methods of psychological and pedagogical diagnostics. In the course of mastering the discipline, students get acquainted with the features of psychosomatic deviations in the behavior of persons with special needs. Students master a set of methods, techniques of pedagogical influence in practical activities. They get acquainted with theoretical and methodological concepts on the problem of correctional pedagogy, analyze their application in practice.

Purpose of studying of the discipline

to form students` knowledge and skills in working with children with special educational needs in development and behavior for their effective education and upbringing.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the essential characteristics of the features of psychosomatic deviations.

2. Owns methods of organizing correctional work.

3. Apply the acquired knowledge in practice.

Short description of discipline

The content of the course considers the essence, patterns, directions of development of the personality of a person with special educational needs, requiring specialized individual methods of education and training. The student analyzes new ways to correct shortcomings in order to achieve maximum independence of the individual in the process of studying this discipline. In addition, they get acquainted with the features of the entry and development of a person with special educational needs in the social environment.

Purpose of studying of the discipline

to form the basic culture of the future teacher, allowing him to master the basic concepts, systems and methods of special pedagogy. Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the features and patterns of psychophysical development of students with special educational needs and the scientific and methodological justification of the educational process for them

2. Uses knowledge of the features and patterns of psychophysical development of preschool and primary school students, including those with disabilities in practical work

3. Has the techniques and skills of analyzing pedagogical situations necessary in professional reflection on the basis of special scientific knowledge

Management In Education

| Discipline cycle | Basic disciplines |
|---------------------------------|-------------------|
| Course | 2 |
| Credits count | 5 |
| Knowledge control form | Examination |
| Chart description of discipling | |

Short description of discipline

The content of the discipline deals with theoretical and organizational-psychological issues of managerial activity. The content reveals the features of the management of the teaching staff in an educational institution. The course introduces the level systems of strategic management of the pedagogical process, theoretical concepts. The content of the topics describes aspects of establishing effective interpersonal interaction, identifying psychological characteristics of managers of managerial activities and their functions. Students master the techniques of managerial communication of information and communicative psychological activity.

Purpose of studying of the discipline

formation of the professional competence of the future teacher in the management of the integral pedagogical process of the school and the implementation of practical activities for the management of an educational institution.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the basic concepts of the theory of the subject

2. Has the skills to manage educational systems

3. Knows the basics of managerial communication as a means of informational and communicative psychological and pedagogical activity

Prerequisites Ethnopedagogy Pedagogy **Postrequisites** Basic and profile disciplines of the EP

Theory of education

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 2 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The content of the disciplines considers the goals of educational work, its structural components and features. In the course of studying the course, theoretical and methodological knowledge was formed about its essence of education, forms and methods, as well as familiarization with modern concepts of educational work in domestic and foreign pedagogical theory and practice. Special attention is paid to the development of modern technologies.

Purpose of studying of the discipline

fundamental theoretical and methodological training of future teachers, students `assimilation of scientific foundations, implementation of purposeful, systematic education of schoolchildren. Education and training of students as future specialists with the work and responsibilities of a class teacher, with the features and functions of work in the process of education and their application of professional knowledge and skills.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the basic concepts of the theory of the subject.

2. Has theoretical and practical skills of the theory of education in working with children.

3. Has basic knowledge on the development of modern concepts and technologies in the theory of parenting.

Theory and methodology of educational work in primary school

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 2 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The discipline is focused on the fundamental preparation of future specialists - primary school teachers for the organization and implementation of educational work in primary schools. Theory and methodology of teaching, acting as an academic discipline in the professional and pedagogical training of primary school teachers, it is part of pedagogy that explores the theoretical foundations of the organization of the educational process, its laws and principles, goals and content, as well as methods, forms, means, conditions of educational work.

Purpose of studying of the discipline

formation of professional and pedagogical competence of the future teacher in the field of theory, methodology and technology of educational work with students.

Learning Outcomes

ON 4 Demonstrate professional knowledge in the field of continuity of modern preschool and primary education in the aspect of readiness of older preschoolers to school conditions.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

Learning outcomes by discipline

1. Knows the basic concepts of the theory of the subject.

2. Has the basic skills of the theory and methodology of educational work.

3. Has knowledge of the importance of the theory and methodology of educational work as a pedagogical science.

5

Examination

Short description of discipline

This course defines the importance of monitoring and diagnostics in the educational process. The content of pedagogical Diagnostics is revealed as a system of quality control of children's education. The discipline is aimed at developing skills and abilities in the use of diagnostic methods. Students get acquainted with the features of the system, tools, methods, and monitoring methods. The student acquires the skills of conducting diagnostics in the work of a class teacher in the pedagogical process of an educational institution.

Purpose of studying of the discipline

to determine the content of the concepts "monitoring", "educational results"; the system of the teacher's work on monitoring the educational results of students

Learning Outcomes

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. To know the features of the monitoring system and methods of its implementation.

- 2. Understand the functions of monitoring and diagnostics in the pedagogical process.
- 3. Apply the acquired knowledge in practice.

Prerequisites

Organizational activities of the class teacher

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The course is aimed at familiarization with the system of work of the class teacher. Students master planning skills, master organizational techniques, as well as methods of creating a strategic plan of education, forms of educational work with students. He deepens his knowledge about the peculiarities of working with parents. The course content introduces students to the organization of extracurricular and extracurricular educational work with primary school children.

Purpose of studying of the discipline

development of the discipline: the formation of students `systematic scientific and theoretical knowledge and practical skills in the field of methods of conducting extracurricular activities on life safety, necessary for school teachers responsible for the life and health of children and adolescents in modern conditions.

Learning Outcomes

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Demonstrate systemic skills in the organizational activities of the teacher.

- 2. Be able to use methods, forms of organizational work in the pedagogical process.
- 3. Use theoretical knowledge in professional activities.

Family Counseling Workshop

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

During the course, the content, types, methods and techniques of family counseling are considered. The course is aimed at the formation and development of knowledge, skills and abilities in the areas and forms of family psychological and pedagogical consultations, where, in turn, the individual and age characteristics of children of different ages are taken into account, the personal and competence characteristics of the teacher-consultant necessary for the successful implementation of the tasks of psychological and pedagogical counseling are considered.

Purpose of studying of the discipline

the formation of ideas about the family and the provision of psychological and pedagogical assistance to parents on issues of childparent relations, the development of skills and abilities in conducting family psychological and pedagogical consultations.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving

pedagogical problems.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the basic theoretical concepts of the discipline

2. Has knowledge of the personal and competence characteristics of a teacher-consultant.

3. Has the skills of conducting family psychological and pedagogical consultations

Methods of teaching literacy and writing in primary school

| Discipline cycle | Basic disciplines |
|---------------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |
| Short description of discipline | |

Short description of discipline

This course examines the psychological and pedagogical foundations of the methodology for teaching literacy and writing to primary school children. In the course of studying the course, students get acquainted with the stages of formation of skills and abilities in teaching literacy, as well as with graphic writing skills, typology, structure and content of literacy lessons. Students master the methods of forming a calligraphic skill during the period of learning to read and write. The method of modeling lessons is considered in detail.

Purpose of studying of the discipline

formation of the bachelor's professional competence in the field of primary education; formation of the student's readiness to carry out pedagogical activities in the main academic disciplines in primary school.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 9 Develop and implement new integrated approaches in teaching private methods.

Examination

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

Learning outcomes by discipline

1. Be able to evaluate the effectiveness of modern methods and technologies for the formation of language concepts, spelling skills. reading skills, work on the analysis of works of various genres.

2. Has the diagnosis of the level of assimilation of language concepts by students, the level of formation of spelling and reading skills. Prerequisites

Pedagogical skills Pedagogy Theory and methodology of educational work in primary school

Postrequisites

Manufacturing practice (Pedagogical)

Literacy training

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The subject is aimed at developing the ability to build logically correct oral and written speech of primary school children. As a result of the training, the student develops the ability to solve educational tasks in the process of basic literacy, mastering the basics of the culture of professional speech. Students will learn how to use modern methods and technologies in the process of teaching reading and writing to primary school children.

Purpose of studying of the discipline

teaching students to write and systematic work on the formation of students` handwriting, preparing future primary school teachers to work on writing and penmanship.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 9 Develop and implement new integrated approaches in teaching private methods.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

Learning outcomes by discipline

1. Possess oral and written speech.

2. Be able to solve educational tasks.

3. Master the methods of reading in the process of learning to read and write.

Psychological and pedagogical foundations of teaching writing

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

This course reveals the features of the organization and conduct of written work in primary school. During the course of the course, students get acquainted with the concept of teaching to the letter of younger schoolchildren. The content of the discipline reflects the goals, objectives, principles of teaching writing. Students get acquainted with the types of written work, technologies of working with texts. Students master methods, forms, techniques, and means of teaching children of primary school age to write.

Purpose of studying of the discipline

to form a system of knowledge among students about the methods and techniques of mastering the psychological and pedagogical foundations of writing by students as a means of communication in oral and written form and prepare them for the implementation of SES in the process of teaching in elementary school; to determine the principles of teaching, to justify methods, to create scientific foundations for the construction of technologies, lessons, their cycles (theoretical, fundamental goal).

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 9 Develop and implement new integrated approaches in teaching private methods.

Learning outcomes by discipline

1. Masters the ways of solving psychological and pedagogical problems of writing.

2. Teaches types of written actions in elementary school.

3. Masters the basics of writing a primary school program.

Prerequisites

Pedagogical skills Pedagogy Theory and methodology of educational work in primary school

Modern pedagogical technologies in education

Discipline cycle

Basic disciplines

Course

Credits count

Knowledge control form

Short description of discipline

The course is aimed at familiarization with modern pedagogical technologies. In the course of studying the discipline, students learn to apply the technologies of developmental learning, modular learning, student-centered learning, level differentiation, critical thinking, problem-based learning. The subject includes methods and techniques for teaching new modern psychological and pedagogical forms, technologies for organizing the pedagogical process. Allows students to expand their knowledge of pedagogical technologies.

Examination

Purpose of studying of the discipline

to equip students with knowledge and skills related to the technologization of the educational process, to motivate them to independently comprehend professional and pedagogical activities.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 9 Develop and implement new integrated approaches in teaching private methods.

Learning outcomes by discipline

1. Demonstrate systematic knowledge of pedagogical technologies.

2. The use of pedagogical technologies in practice.

3. Mastering the skills and abilities to use pedagogical technologies.

Prerequisites

Socialization of children in the family

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The discipline reveals the substantive aspects of the concept of "socialization". The course is aimed at studying the basic methodological concepts of socialization. Such theories of socialization as cognitive theories, psychoanalytic theories of development are considered in detail. The students get acquainted with the maintenance of the family as one of the main institutions of socialization. The discipline is aimed at studying the factors, agents of socialization of children in the family. The mechanisms and stages, means, criteria and results of socialization of the child's personality in the family are considered in detail.

Purpose of studying of the discipline

formation of students' clear ideas about the social and pedagogical aspects of the process of family education, the essence of socialization and individualization of a person; expand the range of theoretical knowledge about modern approaches to the organization and implementation of the process of family education, systematize them, and on this basis successfully solve professional tasks related not only to the upbringing of preschoolers, but also with the choice of content, types and forms of social and pedagogical work with preschool children.

Learning Outcomes

ON 4 Demonstrate professional knowledge in the field of continuity of modern preschool and primary education in the aspect of readiness of older preschoolers to school conditions.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Has knowledge of the psychological and pedagogical foundations of family education

2 Be able to select methods and forms of work with parents

3. Demonstrates knowledge about the content of the child's socialization in the family, taking into account the potential of the family. Prerequisites

Formation of personality in the family

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 3 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The discipline studies the essential characteristics of marriage and family. Students get acquainted with the features of the modern family, its types, functions, structure and dynamics of development. The peculiarities of the influence of the family on the formation of personality are revealed. The forms, methods and principles of positive personality education are considered. Having mastered this course, future teachers will own the content of spiritual, moral, labor, physical and aesthetic education of children, taking into account the potential of the family.

Purpose of studying of the discipline

to contribute to the formation of students' scientific worldview, knowledge of the basic laws of the formation and manifestation of family

relations.

Learning Outcomes

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Has knowledge of the psychological and pedagogical foundations of family education

2. Is able to competently select methods and forms of work with parents for the purpose of positive upbringing of children.

3. Demonstrates knowledge about the content of spiritual, moral, labor, physical and aesthetic education of children, taking into account the potential of the family.

Prerequisites

Organization of methodological work under the conditions of inclusive education

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 6 |
| Knowledge control form | Examination |

Short description of discipline

The course provides for the study of pedagogical support aimed at improving the quality of education and development of students with special educational needs. The content of the course provides for the development of methods and techniques to support the organization of inclusive education. Students get acquainted with the peculiarities of planning and implementation of methodological work in the context of inclusive education, deepening their knowledge will learn to analyze the problem within the framework of the world educational space.

Purpose of studying of the discipline

the formation and development of the competencies of future teachers, allowing for socio-educational professional and methodical work in educational institutions in the conditions of inclusive education.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education. ON 9 Develop and implement new integrated approaches in teaching private methods.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Demonstrate systemic skills in organizing methodological work

2. Apply the acquired knowledge in practice

3. Master the methods of planning methodological work in the context of inclusive education

Basics of speech therapy

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 6 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The content of the course covers the genesis, scientific and theoretical foundations of speech therapy, features and differences of speech disorders, as well as age and speech characteristics of children. In the course of studying the course, students master the organization of correctional activities and the integrated application of the acquired knowledge in other disciplines. Students will learn how to use theoretical knowledge in the field of speech therapy in practical activities, as well as expand their knowledge in psychoprophylactic work with teachers in educational organizations.

Purpose of studying of the discipline

mastering by students of scientific and theoretical foundations, practical skills and abilities in the field of prevention, detection and elimination of speech disorders in children by means of special education and upbringing.

Learning Outcomes

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education. **Learning outcomes by discipline**

1.knows the scientific-theoretical and methodological foundations of the discipline.

2. is able to conduct diagnostics and organize Correctional activities depending on the age characteristics of children.

3. Master interdisciplinary intergrating

Short description of discipline

The course provides for familiarization with the peculiarities of conducting educational work in special (correctional) educational institutions and special boarding schools, homeschooling, inclusive educational work in special schools, special institutions, taking into account the psychological and pedagogical aspects of inclusive education. The content of the course reveals the possibility of organizing educational work in inclusive education. In the course of studying the discipline, students will learn how to plan and implement educational work within the framework of inclusive education.

Purpose of studying of the discipline

the formation and development of the competencies of future teachers, allowing for socio-educational professional and methodical work in educational institutions in the conditions of inclusive education.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Demonstrate the ability to organize educational work in an inclusive education.

2. Have the skills to use the methods and techniques of organizing educational work

3. Apply the acquired knowledge in the context of inclusive education

Prerequisites

Basic and profile disciplines of the EP **Postrequisites** Manufacturing practice (Pedagogical)

Organizational activity of the teacher

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The content of the course is aimed at forming ideas about the peculiarities of the organizational activities of teachers. Students get acquainted with organizational forms of training and their functions. And also expand their knowledge in establishing indirect, direct interaction of the subjects of the educational process. Some essential characteristics of the lesson as an organizational form of learning are considered in detail. During the course, students will learn how to make methodological recommendations on the organization of the work of teachers-organizers.

Purpose of studying of the discipline

formation of skills of analysis and planning of pedagogical activity on the basis of scientific knowledge, regulatory documents, advanced and innovative pedagogical experience.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 6 To carry out pedagogical interaction with parents, to apply the skills of integrated knowledge from various subject areas in solving pedagogical problems.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

- 1. Uses the acquired knowledge in pedagogical activity.
- 2. Demonstrates skills in the field of planning and organizing the pedagogical activity of the educator.

3. Able to analyze the pedagogical activity of the educator.

Deontology

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The course examines the specific features of the system of building ethical values. Professional duty - as a vocation and purpose lies at the heart of the study of the course content. The student studies the basic concepts of deontological science, the essence of deontological readiness, methodological approaches, principles, functions and categories. The content of the course provides for the definition of the relationship of deontology with other sciences. The importance of deontological culture in building relationships with the surrounding reality (family, peers, team, etc.) is revealed.

Purpose of studying of the discipline

to form students` holistic understanding of deontology in the ethical system and the system of values of professional work, to acquaint them with the basic deontological principles, concepts and categories; to determine the essence and content of proper relationships, behavior, actions; to form practical skills for using deontological potential.

Learning Outcomes

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the basic conceptual approaches and principles of deontological science.

2. He is able to improve his personal and moral qualities and positions necessary in future professional activity.

3. Has the skills of organizing psychological support in various areas of activity from the standpoint of a deontological approach. **Prerequisites**

Psychology of professorial self-development of a teacher

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The course reveals the psychological and pedagogical aspects of professional self-development of a teacher. The main conceptual approaches and the history of the formation of professional self-development are considered. The content of the course provides for the study of aspects of planning a professional pedagogical career and personal development. The problem of professional deformation of personality in the process of professional and pedagogical activity is revealed in detail. Students get acquainted with the methods of prevention of professional burnout of teachers, learn to make an individual program of professional and personal growth and self-development.

Purpose of studying of the discipline

to consider the patterns of professional self-development of the individual as a process of preparing students to perform professional functions in the process of professional activity.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 9 Develop and implement new integrated approaches in teaching private methods.

Learning outcomes by discipline

1. Knows the process of professional and personal development, crises, barriers and professional deformations of personality in the field of education.

2. Is able to take into account general, specific patterns and individual features of professional and personal development, constructively interact with participants in the educational process on issues of development and self-development of students in the field of education.

3. To possess skills of professional behavior in non-standard situations in the process of professionalization of personality, selfdevelopment, self-realization and use of creative potential of personality in the process of solving problems of professional deformation of personality.

Prerequisites

Psychological and pedagogical diagnostics of the personality of a younger student

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The discipline reveals the features of psychological and pedagogical diagnostics in the practical work of a teacher. The course content introduces students to the main stages, ethical rules of psychological and pedagogical diagnostics. The specifics of the selection of basic diagnostic tools are considered in detail, taking into account the age, individual characteristics of children of primary school age. The content reveals the methods of research of cognitive processes, emotional – volitional sphere, personal development and interpersonal relationships, educational achievements of primary school children.

Purpose of studying of the discipline

formation of skills and abilities of future primary school teachers in the field of organizing and conducting psychological and pedagogical diagnostics of primary school children, as well as analysis and interpretation of the data obtained during the study to include the identified characteristics of children in working with them.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education. ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Knows the basic concepts and categories of psychological and pedagogical diagnostics in primary school age.

2. Is able to plan a psychological and pedagogical diagnostic examination and interpret the data obtained taking into account diagnostic situations and age characteristics.

3. Knows the rules for the use of basic diagnostic techniques and the psychometric requirements that are imposed on them for effective use in the process of pedagogical activity.

Development of psychological-pedagogical science in Kazakhstan

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

This course examines the emergence and development of psychological and pedagogical science at different stages. During the course, students get acquainted with the origin of pedagogical, psychological science of Kazakhstan, as well as topical issues of the development of education and the pedagogical process. The educational material is aimed at analyzing the works of great thinkers, public figures and scientists. Students get acquainted with the scientific research of the Soviet era and modern Kazakhstan.

Purpose of studying of the discipline

History of development of psychology and pedagogic science in Kazakhstan.

Learning Outcomes

ON 7 To apply in practice new methodological approaches of the holistic pedagogical process in the conditions of preschool education.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 10 Possess the skills of analyzing normative and legal documents in primary education and independently search and select the necessary information on topical issues of primary education.

Learning outcomes by discipline

1. Be able to analyze the development of pedagogical and psychological science.

2. To use the results of scientific research in pedagogical activity.

3. Have the skills to work with historical primary sources.

Prerequisites

Pedagogical skills Pedagogy Theory and methodology of educational work in primary school

Development of digital and functional literacy

| Discipline cycle | Profiling discipline |
|------------------------|----------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The content of the course provides for the study of the relevance of functional literacy for a modern school. Differentiation of the concepts of "academic" and "functional" literacy. The system of educational and cognitive tasks aimed at the development of academic literacy of primary school children is being studied. The correct methods of developing tasks for the formation and evaluation of functional literacy are investigated. The characteristic of all components of functional literacy is revealed, the methodology of conducting training sessions is described.

Purpose of studying of the discipline

formation of students` competencies in the development of digital and functional literacy of students.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Master the terms and concepts of digital and functional literacy.

- 2. Have knowledge about the components of functional literacy and methods of conducting training sessions
- 3. Able to develop tasks to assess the functional and digital literacy of children.

Theory and practice of extracurricular learning

| Theory and practice of extracumental rearring | |
|---|-------------------|
| Discipline cycle | Basic disciplines |
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |

Short description of discipline

The course content reveals the features of extracurricular activities of primary school age students. Studying the course teaches students to create an educational and developing environment at school. The course content introduces students to various forms of organization of extracurricular activities such as competitions, Olympiads, extracurricular reading, electives, clubs. Students get acquainted with the techniques, methods, techniques of planning and organizing extracurricular learning. The significance of the work of a counselor, a class teacher in the organization of extracurricular work in elementary school is revealed.

Purpose of studying of the discipline

formation of professional pedagogical competence of a bachelor in the organization of the pedagogical process aimed at organizing work with students and developing competencies that allow for professional social and psychological pedagogical activities in educational institutions outside of school hours.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 5 Apply the content, methods and forms of developmental and correctional work with children of primary school age.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Possess knowledge about methods and forms of organization of extracurricular education.

2. Demonstrate skills in organizing extracurricular learning.

3. To use theoretical knowledge in pedagogical activity.

Prerequisites

Pedagogical skills Pedagogy Theory and methodology of educational work in primary school

Calligraphy

| Discipline cycle | Basic disciplines |
|------------------------|-------------------|
| Course | 4 |
| Credits count | 5 |
| Knowledge control form | Examination |
| | |

Short description of discipline

The course reveals the peculiarities of teaching calligraphy. Students learn how to properly organize the educational process and manage the educational activities of students. Students get acquainted with techniques, methods, ways to teach calligraphy to children of primary school age. Students deepen their knowledge with new innovative technologies for teaching children calligraphy techniques. The course provides an opportunity to master theoretical and methodological approaches to teach children calligraphy in the learning process.

Purpose of studying of the discipline

preparing graduates to solve professional tasks related to teaching younger schoolchildren calligraphically correct writing, namely, to demonstrate samples of calligraphically correct writing, to study the state of students` calligraphic skills, to identify and correct violations of calligraphic norms that inevitably and naturally occur in children.

Learning Outcomes

ON 3 Use and generate acquired practical and theoretical knowledge in the field of pedagogical activity.

ON 8 Demonstration of systematic skills in the use of modern and innovative technologies in the pedagogical process.

ON 11 Conduct an analysis of pedagogical activity and use its results in the pedagogical process.

Learning outcomes by discipline

1. Demonstrate the skills of applying the technique of teaching children to calligraphy.

- 2. Master the methods and techniques of teaching caligraphy.
- 3. Apply the acquired knowledge in practice.

Prerequisites

Pedagogical skills Pedagogy Theory and methodology of educational work in primary school **Postrequisites** Manufacturing practice (Pedagogical)

Critical thinking

| Discipline cycle | Basic disciplines |
