- 3) make effective administrative decisions in professional activities, develop and implement management strategies, adequately evaluate the results of the team's work.

Prerequisites

Introduction to Accounting and Finance

Postrequisites

Financial management

Statistics and financial mathematics

Discipline cycle	Basic disciplines
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

When studying the course, the methodological and practical foundations of statistics and financial mathematics are considered. Students should master the methodology of calculating statistical economic indicators, processing and analyzing financial information. Discipline is necessary for the formation of future specialists with practical experience in this field, which would allow them to quickly implement their immediate functional responsibilities, while competently managing the levers and tools of accounting and finance.

Purpose of studying of the discipline

The purpose of studying the discipline is the study of statistical methodology: general principles, techniques, methods of collecting and processing statistical data analysis, the study of patterns and trends in the development of mass social phenomena and processes, their quantitative characteristics.

Learning Outcomes

ON 2 Demonstrate knowledge that contributes to the formation of a holistic personality in the economic and legal environment and increase the responsibility of the individual

Learning outcomes by discipline

- 1) mastering a new terminological apparatus
- 2) acquisition of practical skills in statistics and financial mathematics
- 3) formation of labor skills in this field

Prerequisites

Introduction to Accounting and Finance

Postrequisites

Financial management

International financial and economic relations

Discipline cycle	Basic disciplines
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

The academic discipline "international financial and economic relations" is aimed at creating a whole set of concepts and concepts in students about their composition, content, structure, characteristics, features, current trends on a macro scale, creating new financial unions, funds and enclaves in the format of skills and competencies presented for the purpose of Applied.

Purpose of studying of the discipline

To form a holistic view of the students, to have a solid knowledge of international financial and economic relations, the laws of development, the basic principles and forms of organization of these relations for understanding the essence, mechanisms, development trends, modern problems and approaches to their solution.

Learning Outcomes

ON 6 Apply fundamental skills and knowledge of finance for professional development and managerial decision making in the organization of the company's financial activities.

ON 7 Is able to choose the optimal schemes of taxation, insurance, investment, lending, financing by comparing conditions, cost, alternatives, cash flows and liabilities

ON 8 Is able to apply basic theoretical knowledge in the field of corporate governance, to navigate the current trends in the development of the financial market and international financial institutions

Learning outcomes by discipline

- 1) Mastering new terminological apparatus
- 2) Acquisition of practical skills of work in the field of international financial and economic relations
- 3) Formation of skills of work in this industry

Prerequisites

Fundamentals of finance

Postrequisites

Financial management

International finance

ON 7 Is able to choose the optimal schemes of taxation, insurance, investment, lending, financing by comparing conditions, cost, alternatives, cash flows and liabilities

ON 8 Is able to apply basic theoretical knowledge in the field of corporate governance, to navigate the current trends in the development of the financial market and international financial institutions

Learning outcomes by discipline

1) Mastering new terminological apparatus

2) Acquisition of practical skills of work in the field of international finance

3) Formation of skills of work in this industry

Prerequisites

Fundamentals of finance

Postrequisites

Financial management

Socio- economic statistics

Discipline cycle

Basic disciplines

Course

1

Credits count

5

Knowledge control form

Examination

Short description of discipline

The discipline forms a system of knowledge about the methods of statistical analysis and their application in assessing the state and prospects of development of socio-economic phenomena and processes. As a result, students are able to use the methodology of calculating statistical evaluation, the big data system of economic and social processes and their results to determine the relationship on the scale of the country`s economy, regions and sectors of the national economy.

Purpose of studying of the discipline

Acquaintance with the methodology and principles of socio - economic statistics; development of knowledge, abilities and skills of independent work on carrying out practical calculations using statistical schemes, tables and graphs with the presentation of an economic justification based on the use of general theoretical statements

Learning Outcomes

ON 2 Demonstrate knowledge that contributes to the formation of a holistic personality in the economic and legal environment and increase the responsibility of the individual

Learning outcomes by discipline

1) As a result of the study knows the new orientations of statistics aimed at the transformation of previously established economic relations and statistical analysis

2) He/she is able to collect, process and analyze statistical information independently for presentations of the results of statistical research.

3) Has skills of practical application of knowledge and skills in mastering the technique of calculation of generalizing micro:macroeconomic indicators characterizing the socio-economic development of society.

Prerequisites

Introduction to Accounting and Finance

Postrequisites

Financial Accounting

Finances of foreign countries and the basics of Islamic finance

Discipline cycle

Basic disciplines

Course

1

Credits count

5

Knowledge control form

Examination

Short description of discipline

Mastering the discipline " Finance of foreign countries and fundamentals of Islamic finance " will allow developing applied skills on the problems of modern functioning of financial systems of foreign countries, including the USA, Canada, Southeast Asia and Europe, CIS countries, as well as the formation of a basic set of knowledge to understand the basics of Islamic finance.

Purpose of studying of the discipline

The purpose of teaching the discipline is to study the essence and specifics of the finances of foreign countries, Islamic finance, their role in regulating social and economic processes, the specifics of the formation of financial resources

Learning Outcomes
