Introduction to the profession of a physical education and sports teacher

Discipline cycle	Basic disciplines
Course	1
Credits count	3
Knowledge control form	Examination

Short description of discipline

The discipline gives knowledge about the basics of general and sports pedagogy, the state system of physical education. It reveals a brief overview of the structure of the work of sports and educational institutions of physical culture, health and sports content. Provides information about the system of functioning of the educational process at the university. The features of the methodology for searching for the processing of the necessary information from various sources and application in the learning process are studied.

Purpose of studying of the discipline

The discipline introduces the system of obtaining education in a higher educational institution, directs the development of organizational requirements of the general educational process, introduces the specifics of the specialty of Physical Culture and sports.

Learning Outcomes

ON 3 Apply the basics of pedagogical knowledge in the field of physical education in the organization of the educational process, the application of the educational and material and regulatory framework of educational institutions.

Learning outcomes by discipline

- Mastered the requirements of the educational process in a higher educational institution
- Can be used in the organization of physical culture and sports
- Uses new technologies in the learning process.

Prerequisites

School course

Postrequisites

Basic and profile disciplines of the EP

Age psychology and physiology

Discipline cycle	Basic disciplines
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

The course allows you to form an idea of human anatomy and physiology, the specifics and features of age-related development, the patterns of higher nervous activity and functional features of the human nervous system are considered. Forms students' systematic understanding of mental and physiological development in ontogenesis, the main patterns of development and neoplasms of age, the most important mental features of the emerging personality of the child on the basis of taking into account psychophysiological norms.

Purpose of studying of the discipline

Formation of students' ideas about the diversity of approaches to the development of correct, scientific knowledge, mental and physiological development of a person in ontogenesis on the most important issues of psychology and physiological development in the aspect of cultural development. To equip students with theoretical and practical knowledge that contributes to strengthening their professional psychological, pedagogical and physiological training, in-depth study of the section of psychological and physiological knowledge.

Learning Outcomes

Pedagogy

Discipline cycle	Basic disciplines
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

The content of the discipline is aimed at forming students' holistic understanding of the theoretical and methodological foundations of pedagogical science and the essence of professional pedagogical activity. Studying the course allows you to form the necessary knowledge about the content, principles, forms and methods of organizing a holistic pedagogical process in an educational environment. The study of the course forms the necessary competencies for the successful implementation of modern approaches in teaching and learning.

Purpose of studying of the discipline

Pedagogy as an academic discipline aims to form students' knowledge about the object and subject of pedagogy, its functions, categorical apparatus, methodology of science. The study of the course provides for the formation of the necessary competencies in the design and evaluation of the pedagogical process in the conditions of an educational institution. The content of the discipline topics allows you to acquire knowledge and skills in the selection and successful application of forms, means, methods of teaching and upbringing.

Learning Outcomes

ON2 Apply modern teaching technologies and criteria-based assessment, taking into account the individual, physiological and psychological characteristics of students.

Learning outcomes by discipline

ON2 Apply modern teaching technologies and criteria-based assessment, taking into account the individual, physiological and psychological characteristics of students.

1. Knows the basic concepts of the theory of the subject

2. Has knowledge in the system of pedagogical training and makes decisions taking into account the holistic pedagogical process

3. Applies the basic skills of the teacher's profession

Prerequisites

School course

Postrequisites

Basic and profile disciplines of the EP

Educational practice

Discipline cycle	Basic disciplines
Course	1
Credits count	2
Knowledge control form	Total mark on practice

Short description of discipline

The discipline introduces a complex of psychological and diagnostic methods for mastering the basics of organizing the educational process of the university.

Introduces the educational and material base of the university and the system for receiving basic tests, tasks and exercises for the program of school physical education. Creates conditions for obtaining primary work experience in the physical culture team of the university.

Purpose of studying of the discipline

Educational practice is the development of general cultural competencies of students, the acquisition of primary professional competencies by students, the acquisition of the first skills of research activity, business correspondence skills, the acquisition of practical skills and work skills in accordance with the educational program.

Learning Outcomes

ON 3 Apply the basics of pedagogical knowledge in the field of physical education in the organization of the educational process, the application of the educational and material and regulatory framework of educational institutions.

Learning outcomes by discipline

- know and understand the structure and content of state compulsory standards, standard programs of an academic subject;
- apply the regulatory framework in professional activities;
- apply interdisciplinary knowledge in professional activities;
- develop ideas about design, organization, analysis of the work of specialists and managers;
- organize work in a multicultural environment of the organization;
- reflect the results of design and analysis of activities in reporting documentation, select materials for a specific task.

Prerequisites

School course

Postrequisites

Pedagogical practice

Inclusive education

Discipline cycle	Basic disciplines
Course	2
Credits count	3
Knowledge control form	Examination

Short description of discipline

When studying the discipline, students acquire knowledge about the principles and methodological foundations of inclusive education. Ideas are being formed about modern models of psychological and pedagogical support for children with special needs, the elimination of existing barriers in the legal support of inclusive education and the competence of organization and management in the area of inclusive practice. Get an idea about the models of psychological and pedagogical support for children with disabilities in educational institutions.
