Foreign language (professional)

Discipline cycle	Basic disciplines
Course	1
Credits count	3
Knowledge control form	Examination

Short description of discipline

Mastery of general cultural, professional and special competencies for the implementation of professional activities, involving teaching free reading of original literature of the relevant branch of knowledge in a foreign language; development of oral communication skills in monological and dialogical form in the specialty; development of written scientific communication skills on topics related to the scientific work of a graduate student, as well as familiarization with the forms and types of international cooperation in the scientific field.

Purpose of studying of the discipline

The purpose of studying the discipline "Foreign language (professional)" in the master's degree program is the systematic deepening of communicative competence within the framework of international standards of foreign language education on the basis of further development of skills and abilities of active language proficiency in the professional activity of the future master.

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

- to know the specifics of oral and written speech in the fields of professional, scientific, socio-political relations;
 - to know the national and cultural peculiarities of the creation and organization of a text in a foreign language within the framework of professionally motivated conditions;
 - to know the stylistic features of the vocabulary of a foreign language in the field of professional communication;
- be able to perform:
- implementation of professional activity in linguistic, sociolinguistic, information-analytical and communicative aspects;
 - creating your own verbal and non-verbal order in the fields of professional and scientific socio-political relations;
 - the use of a variety of language and speech means adequate to social factors, communication conditions, the status of the interlocutor and his communicative intentions;
 - be able to organize speech activity as a representative of another culture and the nature of communication in accordance with the tasks of communication, the speech situation, individual characteristics;
- the presence of skills:
- to perceive by ear and understand the appropriate level of messages of a business, informational and vocational nature;
 - dialogical and monological communication within the framework of professional activity;
 - to get acquainted and study business and scientific and technical documentation, which provides for obtaining information from what has been read and using it in speech;
 - has the skills of systematic presentation of thoughts, thinking, information when writing letters of an official, professional nature;

Prerequisites

Bachelor

Postrequisites

Final examination

History and philosophy of science

Discipline cycle	Basic disciplines
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

The discipline is aimed at studying the culture of scientific thinking, forms analytical capabilities and research skills, provides theoretical and practical knowledge necessary for a future scientist. Explores the historical evolution of the sciences and the philosophical perspectives they form. The origins of modern science, its social and institutional connections are described. General philosophical issues related to thought experiments, confirmation and refutation of theories, the origin and application of quantitative and high-quality research methods are considered.

Purpose of studying of the discipline

the formation of an interdisciplinary worldview among undergraduates, based on a deep understanding of the history and philosophy (theory) of scientific thinking, as part of a universal culture.

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

be able to apply fundamental scientific, pedagogical, managerial, and communicative knowledge and skills in professional activities

Prerequisites

Bachelor

Postrequisites

Final examination

Higher Education Pedagogy

Discipline cycle	Basic disciplines
Course	1
Credits count	3
Knowledge control form	Examination

Short description of discipline

The course is aimed at studying the main directions, principles and patterns of higher education. During the course of the course, the

basic concepts of modern pedagogy, concepts and theories of teaching and upbringing, didactics of higher education will be considered. The master's student will master the skills of designing the organization of the educational process, techniques of individual and group reflection, will be able to correctly formulate pedagogical goals, apply educational technologies in the educational process. in the process, to design work programs of disciplines.

Purpose of studying of the discipline

The purpose of mastering the discipline is to master the system of knowledge about higher education, its content, structure, principles of educational process management and mastering modern technologies in the field of management and organization of the educational process

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

- Be able to solve the problems of higher pedagogical education and the prospects for its further development;
- Have the skills to consider the application of effective university technologies;
- Solve topical and psychological and pedagogical problems,

Prerequisites

Bachelor

Postrequisites

Pedagogical practice

Psychology of management

Discipline cycle	Basic disciplines
Course	1
Credits count	3
Knowledge control form	Examination

Short description of discipline

The content of the course is aimed at mastering the approaches and directions of management psychology, psychological laws of management, features of planning and solving management problems. Students will get acquainted with the psychological methods of resolving conflict situations, master the ways of motivating work, the methods of using effective management styles. Skills will be formed to analyze the psychological causes underlying the decline in the effectiveness of the management process.

Purpose of studying of the discipline

The purpose of the discipline "Psychology of Management" is the formation of scientifically based ideas about the system of mental phenomena, psychological variables of behavior and conscious human activity in modern conditions and allows undergraduates to form skills of applying the acquired psychological knowledge in educational activities

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

- be able to determine the forms and methods of effective team management;
- develop plans for the development of organizations, provide psychological support for the activities of organizations;
- possess methods of solving managerial tasks.

Prerequisites

Bachelor

Postrequisites

Pedagogical practice

Research activities of students in history

Discipline cycle	Profiling discipline
Course	1
Credits count	5
Knowledge control form	Examination

Short description of discipline

The discipline forms research skills in the preparation of a scientific project in the context of current trends in modern historical science. The ability to substantiate the goals and objectives of the project, the skills of working in information retrieval systems are formed. The specifics of the implementation of scientific research among schoolchildren and students, methods of searching and processing information are considered.

Purpose of studying of the discipline

development of creative and research skills of students, familiarization with new directions in the study of national and world history.

Learning Outcomes

ON4 to introduce the results of scientific research into practical pedagogical activity.

ON5 Work with national and international databases.

ON6 Analyze and summarize the results of scientific research on the basis of modern interdisciplinary approaches.

Learning outcomes by discipline

- 1) demonstrate knowledge of new directions in the study of history;
- 2) apply innovative research methods;
- 3) develop creative and research skills.

Prerequisites

Information technology in historical research

Postrequisites

The research work of a student, including an internship and the implementation of a master's thesis II Actual problems of national history and historiography

The research work of a student, including an internship and the implementation of a master s thesis

I

Discipline cycle	Profiling discipline
Course	1
Credits count	11
Knowledge control form	Total mark on practice

Short description of discipline

Justification of the choice of the topic and its relevance, determination of the purpose, objectives, research methodology, hypothesis formation, analysis of sources. Introduces the methodology of the organization of research work. Carries out work with scientific historical literature, develops abilities and practical skills of independent implementation of scientific research.

Purpose of studying of the discipline

development of the ability and practical skills of independent implementation of scientific research related to the solution of complex scientific and research tasks in innovative conditions

Learning Outcomes

ON4 to introduce the results of scientific research into practical pedagogical activity.

ON5 Work with national and international databases.

ON6 Analyze and summarize the results of scientific research on the basis of modern interdisciplinary approaches.

Learning outcomes by discipline

1) the approved topic of the dissertation and the schedule of work on the dissertation, indicating the main activities and deadlines for their implementation; setting goals and objectives of the dissertation research;

2) definition of the object and subject of research; justification of the relevance of the chosen topic;

3) selection and study of the main scientific sources that will be used as a theoretical basis for research.

Prerequisites

Basic and profile disciplines of the EP

Postrequisites

Final examination

Pedagogical practice

Discipline cycle	Basic disciplines
Course	2
Credits count	6
Knowledge control form	Total mark on practice

Short description of discipline

mastering the following professional and pedagogical skills – to be guided in the organizational structure and legal documentation; in the theoretical foundations of the taught subject; to use modern technology in the process of vocational training; to find, make and implement management decisions in their scientific and pedagogical practice; to have a culture of speech, communication.

Purpose of studying of the discipline

- study of the basics of pedagogical and educational-methodical work;

- formation of practical teaching skills in higher education;

- mastering various educational technologies, methods and techniques of oral and written presentation of subject material that contribute to improving the quality of the educational process;

- obtaining new knowledge about the means of ensuring the implementation of educational standards, about the types of professional pedagogical activity;

- obtaining and developing the skills of conducting educational work.

Learning Outcomes

ON1 Apply fundamental scientific, pedagogical, managerial, communicative knowledge and skills in professional activities.

Learning outcomes by discipline

- analyze and summarize the data of scientific and methodological literature, advanced pedagogical experience;

- navigate the regulatory documentation;

- plan and conduct all forms of training sessions;

- to organize and conduct cultural and educational events.

Prerequisites

Modern educational technologies: the technology of development of critical thinking (in English)

Postrequisites

Research scientific training

The research work of a student, including an internship and the implementation of a master s thesis

II

Discipline cycle	Profiling discipline
Course	2
Credits count	4
Knowledge control form	Total mark on practice

Short description of discipline

Carries out work with scientific historical literature, develops abilities and practical skills of independent research, acquires and accumulates experience in preparing publications and active participation in the work of scientific seminars and conferences.

Purpose of studying of the discipline

conducting research work within the framework of the chosen topic.

Learning Outcomes

ON4 to introduce the results of scientific research into practical pedagogical activity.

ON5 Work with national and international databases.

ON6 Analyze and summarize the results of scientific research on the basis of modern interdisciplinary approaches.

Learning outcomes by discipline

Prerequisites

Basic and profile disciplines of the EP

Postrequisites

Final examination

Research scientific training

Discipline cycle	Profiling discipline
Course	2
Credits count	13
Knowledge control form	Total mark on practice

Short description of discipline

to analyze the scientific literature and electronic information resources with the aim of choosing the direction of research, organization and holding of scientific-research works, ability of setting the theoretical and applied goals and objectives of the research and the development of their implementations based on the achievements of historical science and modern technology.

Purpose of studying of the discipline

the expansion of professional knowledge obtained by them in the course of training, and the formation of practical skills and skills for conducting independent scientific work, and should also provide for the consolidation, deepening and addition of theoretical knowledge obtained in the study of special disciplines; the acquisition of experience in managerial, organizational and educational work in a team; the collection of material - for writing a master's thesis.

Learning Outcomes

ON4 to introduce the results of scientific research into practical pedagogical activity.

ON5 Work with national and international databases.

ON6 Analyze and summarize the results of scientific research on the basis of modern interdisciplinary approaches.

Learning outcomes by discipline

- systematize and analyze the collected information;*
- use the methodology of scientific research in relation to the topic of the dissertation work;*
- use modern information technologies when processing information for a master's thesis;*
- think creatively and be creative in solving new problems and situations.*

Prerequisites

Actual problems of national history and historiography

Postrequisites

Final examination

The research work of a student, including an internship and the implementation of a master s thesis

III

Discipline cycle	Profiling discipline
Course	2
Credits count	9
Knowledge control form	Total mark on practice

Short description of discipline

Bringing the research to the finished results (theoretical and practical), preparation of factual material for the dissertation work collected using modern research methods, processing of the results, assessment of their reliability and sufficiency to complete the work on the dissertation, preparation of the final text of the master's thesis.

Purpose of studying of the discipline

writing and execution of the final text of the master's thesis.

Learning Outcomes

ON4 to introduce the results of scientific research into practical pedagogical activity.

ON5 Work with national and international databases.

ON6 Analyze and summarize the results of scientific research on the basis of modern interdisciplinary approaches.

Learning outcomes by discipline

- Summing up on the topic of the dissertation research,*
- submission of the completed version of the master's thesis for pre-defense.*

Prerequisites

Basic and profile disciplines of the EP

Postrequisites

Final examination
